

Vehicle Wash & Sheet

Formulated to clean vehicles in both manual applications and automatic car wash systems. This low foaming formula will sheet off of vehicles, reducing rinsing and the need for drying, while avoiding spotting.

How to Use

Manual Vehicle Washing

Add one pak to a printed PAK-IT 5 gallon pail. Add 2 gallons of water and allow pak to completely dissolve. Once pak has dissolved, add an additional 3 gallons of water with a hose. Scrub vehicle as needed with brush. Rinse car completely with clean water. Allow vehicle to air dry.

Automatic Vehicle Washing Systems

Add one pak for every 5 gallons of water to be added to a printed PAK-IT 55 gallon drum. Insert the chemical dip tub from the equipment into drum. Make sure the product is being pulled into the system. Adjust the amount of product being pulled into the system with the adjustment screw on intake block. One 55 gallon drum will clean 150-200 cars.

Vehicle Pressure Washing Systems

Add TWO paks to a printed PAK-IT 5 gallon pail. Add 3-5 gallons of water and allow PAK-IT to completely dissolve. GENTLY mix after paks have completely dissolved to avoid foaming. Insert power washer dip into pail. Coat entire vehicle with detergent using power washer nozzle. Scrub vehicle as needed with brush. Rinse car completely on high pressure.

Technical Data

Pak Size: 40 Grams

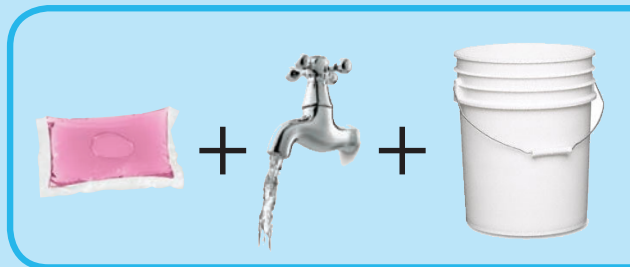

Solubility in Water: Complete

pH at Use Dilution: 8.5 ± 0.5

Color: Clear Pink

Fragrance: None

Phosphates: None
